TECHINFO
Technical Information for the Design of Facilities

Introduction

TECHINFO is an internet based system for the dissemination of Corps of Engineers criteria and other information related to the design of facilities.

The system is provided for the use of designers within the Corps of Engineers or performing work for the Corps of Engineers. Criteria and information are maintained current on the system as changes occur. TECHINFO is an official source of Corps of Engineers design and construction criteria.

TECHINFO is a Headquarters, U.S. Army Corps of Engineers system and is maintained and operated by the Huntsville Engineering and Support Center.

Content

*   *Guide Specifications for Construction* **(CEGS).**
*   *Construction Criteria Documents including: Unified Facilities Criteria; Technical Manuals (TM-5-800 Series); Engineer Regulations; Engineer Manuals Engineer Technical Letters; and Technical Instructions.*
*   *Lists of personnel* responsible for various criteria documents.
*   *Links to software and library of CADD designs.*
